

SYSTEM FOR DISPLAYING PROGRAMMING
GUIDE INFORMATION

ABSTRACT OF THE DISCLOSURE

5 A method is provided for displaying programming
information. A video comprising a plurality of frames is
displayed on a portion of a display. A first panel is
displayed in response to a first signal from a user
interface. The first panel is displayed on another
10 portion of the display simultaneously with the video.
The first panel contains information from at least one of
a plurality of records, the records containing
programming information, each of the records having an
associated time and an associated channel, and the first
15 panel having an associated time range and an associated
range of channels. A new record is selected in response
to a second signal from a user interface. A second panel
is displayed simultaneously with the video, the second
panel having an associated time range that is different
20 than the associated time range of the first panel and the
second panel having an associated range of channels that
is the same as the associated range of channels of the
first panel.
